

META ADS CAMPAIGN REPORT

JioMart

Catalogue Advertising Campaign on Facebook & Instagram

April 2026 | 5-Product Catalogue | ₹3,00,000 Budget

Platform	Ad Format	Objective
Facebook & Instagram	Product Catalogue Ads	Sales — Conversions

Section 1: Campaign Objective

1.1 About JioMart

JioMart is Reliance Retail's e-commerce and grocery delivery platform launched in 2020. It offers groceries, dairy, household essentials, and personal care products to millions of consumers across India. JioMart competes directly with Amazon, Flipkart, and BigBasket, with a unique advantage of deep penetration into Tier 2 and Tier 3 cities through Reliance's offline retail network.

1.2 Selected Objective: Sales — Catalogue Ads

Campaign Objective

Objective: SALES — Catalogue Sales (Dynamic Product Ads)

Ad Type: Advantage+ Catalogue Ads (formerly Dynamic Product Ads / DPA)

Catalogue: JioMart Products — 5 active products across Grocery, Dairy & Home Care

Campaign Structure: Campaign → Ad Set (audience-based) → Ad (dynamic from catalogue)

Justification

JioMart's primary goal is to drive online purchases — not just awareness or traffic. The Sales (Catalogue) objective lets Meta's algorithm automatically show each user the most relevant product from JioMart's catalogue based on their browsing behaviour, purchase history, and interests. Catalogue Ads are ideal for JioMart because: (1) They display personalised products to each user dynamically, (2) They retarget cart abandoners with the exact product they viewed, (3) They auto-update when prices or availability change in the feed, and (4) They run simultaneously across Facebook, Instagram, and Audience Network.

Section 2: Performance Goal, Location & Budget

2.1 Performance Goal

Performance Goal

Primary Goal: Maximise Purchase Conversions — ROAS Optimised

Target ROAS: 4x–6x

Cost Per Purchase (CPP): Target $\leq$ ₹120 per order

Attribution Window: 7-day click, 1-day view (industry standard for e-commerce)

Tracking Setup: Meta Pixel + Conversions API (CAPI) — ViewContent, AddToCart, Purchase events

Justification

Purchase conversions directly align with JioMart's revenue goals. Optimising for ROAS ensures Meta's algorithm serves ads to users most likely to buy — not just click. A CPP target of ₹120 is achievable in the Indian e-commerce market where average order values for FMCG/grocery range from ₹250–₹800. The 7-day click / 1-day view attribution window captures both impulsive buyers and those who consider their purchase over a few days.

2.2 Target Locations

City / Region	Tier	Rationale
Mumbai, Delhi NCR, Bengaluru	Tier 1	Highest internet penetration, metro shoppers, high-volume FMCG demand
Hyderabad, Chennai, Pune	Tier 1	Large tech workforce, high disposable income, strong e-commerce adoption
Jaipur, Ahmedabad, Lucknow	Tier 2	Fast-growing e-commerce market; lower CPMs with growing digital adoption

Nagpur, Surat, Bhubaneswar	Tier 2	Strong Jio telecom penetration; JioMart delivery network available
Pan-India Tier 3 Towns	Tier 3	JioMart's unique advantage — Reliance retail network in smaller cities

□ Justification

JioMart's competitive edge over Amazon/Flipkart lies in its Tier 2 and Tier 3 reach. Tier 2/3 cities offer 30–50% lower CPMs with a growing base of first-time online shoppers. Tier 1 cities drive volume and revenue. All three tiers are targeted to maximise the impact of JioMart's actual delivery network. Location exclusions are applied where JioMart delivery is unavailable.

2.3 Budget Allocation

Budget Type	Amount	Strategy
Total Monthly Budget	₹3,00,000	Campaign Budget Optimisation (CBO) — Meta allocates across ad sets dynamically
Daily Average	₹10,000/day	Meta can flex $\pm 25\%$ daily based on opportunity
Prospecting Ad Set (50%)	₹1,50,000	Lookalike + broad targeting — new customer acquisition
Retargeting Ad Set (30%)	₹90,000	Cart abandoners + product viewers — high-intent warm audiences
Upsell Ad Set (20%)	₹60,000	Past purchasers — cross-sell complementary products

□ Justification

₹3,00,000/month (₹10,000/day) is appropriate for a Tier 1+2+3 metro multi-category campaign. CBO lets Meta dynamically allocate more budget to whichever ad set is performing best on a given day. The 50/30/20 split follows e-commerce best practice: Prospecting builds the funnel with new users, Retargeting captures high-intent users who are closest to buying, and Upsell increases the average order value from existing customers.

Section 3: Placements, Targeting, Age & Gender

3.1 Ad Placements

Placement	Platform	Format	Why Selected
Facebook Feed	Facebook	Carousel / Single Image	Highest purchase intent; primary product discovery surface
Instagram Feed	Instagram	Carousel / Single Image	Strong visual discovery; ideal for FMCG and household products
Instagram Stories	Instagram	Full-screen vertical	High reach 18–34; immersive format drives impulse purchases
Instagram Reels	Instagram	Short video / Image	Fastest-growing placement in India; organic-feeling content
Facebook Marketplace	Facebook	Product card	Users in buying mindset; very high purchase intent
Facebook Reels	Facebook	Short video	Low CPM; extends reach to Facebook's growing Reel users

3.2 Audience Targeting — Three-Layer Funnel

Ad Set 1 — Prospecting (New Customer Acquisition)

Method: Lookalike Audiences (LAL) + Broad Targeting with Interest Stacking

Seed Audience: Top 20% of JioMart's existing purchasers (value-based LAL)

LAL Size: 1%–3% Lookalike (tight similarity to best customers)

Interests: Online shopping, Grocery delivery, BigBasket, Swiggy Instamart, Amazon India, Household products, Daily essentials, FMCG brands

Behaviours: Online shoppers (last 30 days), Engaged shoppers, Jio/JioPhone users, Mobile shoppers

Ad Set 2 — Retargeting (Warm Audiences)

Audience: Website/App visitors who did NOT complete a purchase

Segments (Priority Order):

- Cart Abandoners — last 7 days (HIGHEST PRIORITY)
- Product page viewers — last 14 days
- Category browsers — last 30 days
- Checkout initiated but not completed — last 7 days

Exclusions: Users who already purchased in last 7 days

Ad Set 3 — Upsell / Cross-Sell (Existing Buyers)

Audience: Past purchasers — last 30 to 90 days

Goal: Show complementary products to increase basket size and lifetime value (LTV)

Example: User who bought Atta → Show Sunflower Oil, Colgate, Surf Excel

Exclusion: Users who purchased in last 3 days (avoid over-frequency)

3.3 Age & Gender Targeting

Segment	Age	Gender	Rationale
Primary	25–44	All	Main household decision-makers; highest grocery/FMCG purchase intent
Secondary	18–24	All	Students and young professionals; high mobile usage, impulse buying
Tertiary	45–55	All	Tech-adopting households using JioMart for daily convenience
Excluded	Under 18	—	Not legally targetable; low purchasing power for e-commerce

□ Justification

Age 25–44 represents the primary grocery and household shopping demographic in India. Gender is kept as 'All' since FMCG and grocery shopping is not gender-specific — both men and women are significant buyers across JioMart's 5 product categories. 18–24 is included to capture hostel/PG students ordering groceries and personal care products online.

Section 4: JioMart Product Catalogue

The catalogue is set up in Meta Commerce Manager under the name 'Jio Mart Products'. All 5 products are active, in stock, and show both the original (MRP) and sale price, making them eligible for Dynamic Product Ads.

4.1 Catalogue Configuration

Catalogue Setup — Meta Commerce Manager

Catalogue Name: Jio Mart Products

Total Products: 5 active products | 5 variants

Status: All products In Stock — eligible for Dynamic Product Ads

Data Source: Manual upload via Commerce Manager (can be upgraded to scheduled feed URL)

Pixel Connected: Yes — ViewContent, AddToCart, InitiateCheckout, Purchase events

Product Sets: Daily Essentials | On Sale | Home Care | Dairy & Staples

4.2 The 5 Products (as uploaded in Commerce Manager)

#	Product Name	Content ID	Category	Sale Price	MRP	Availability
1	Amul Gold Full Cream Milk 1L (Pouch)	t2hzpz8qk6	Dairy	₹66.00	₹67.00	In stock

CARD 1	CARD 2	CARD 3	CARD 4	CARD 5	CARD 5 (CTA)

Ad Set 2: Retargeting — Cart Abandoners & Product Viewers

Creative 2A — Dynamic Single Image: Cart Abandonment

□ How Dynamic Fields Work

Meta automatically replaces `{{product.name}}`, `{{product.price}}`, and `{{product.image}}` with the exact product the user viewed or added to cart. Each user sees a personalised ad showing their specific item.

□ Creative 2A Details

Format: Dynamic Single Image — personalised per user from catalogue

Placement: Facebook Feed + Instagram Feed + Instagram Stories

Audience: Cart Abandoners — last 7 days (HIGHEST PRIORITY)

Product Set: On Sale (all 5 products)

□ Primary Text (Dynamic Fields in `{{ }}`)

"Still thinking about `{{product.name}}`? □ It's still waiting in your cart on JioMart! Complete your order today — we can't hold it forever. Only limited stock left. Click below to finish your purchase and get FREE delivery above ₹299!"

Element	Copy / Value
Headline	" <code>{{product.name}}</code> — Now at <code>{{product.current_price}}</code> "

Description	"Your cart is saved. Complete checkout before it sells out!"
CTA Button	"Complete Purchase"
Destination	Deep link to user's cart page on JioMart app/website
Urgency Badge	"Only X left in stock!" — auto-filled from catalogue inventory field
Visual	Product image auto-pulled from catalogue; orange 'Complete Your Order' ribbon at top; price badge showing original vs sale price
